5:30 PM. - 8:30 PM

FREE Educational Event

Limited Space – Reserve Your Seat

AGENDA

5:30 PM Networking/Appetizers
6:30 PM Panel/Audience Discussion
8:00 PM Wrap-up/Networking

LOCATION

Cooper's Hawk
4110 W Boy Scout Blvd
Tampa, FL 33607

SPONSORS

Cyber-attacks have been deemed one of the greatest threats and concerns to eight global economies. The US is on that list according to the WEF Global Risks Report.

You are invited to participate in the IT Peer Group Forum's first event of 2019. Our panel will discuss real-world issues such as cloud hacks and software application infiltration considered to be the most likely cause of cyber-attacks.

The CIO of a large third-party logistics company, the inventor of what is considered the "fastest development tool in the world" and one of the premier "penetration testing" consultants in the Southeast will be the featured speakers. Shadow IT, fact or fiction on the latest cybersecurity solutions, new methods of attacks, and IOT are topics on the agenda.

Join us and be part of the discussion.
